## WILL APPLES SINK OR FLOAT?

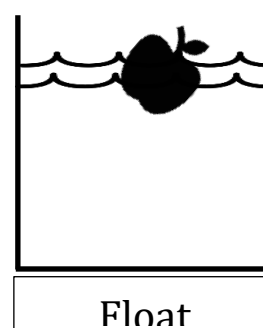

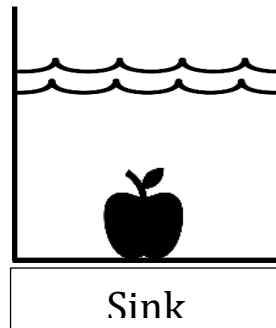

Directions: Today, you will perform an experiment to find out if apples **sink** (go below the water) or **float** (stay above the water). Before scientists perform an experiment, they make a **prediction** (an educated guess) about what will happen.

1. Do you predict that an apple will sink or float? Circle your answer.

Now perform the experiment with an adult!

2. Did your apple sink or float? Circle your answer.

3. Was your prediction correct? Circle your answer.
